

# the Computer Journal

## A new era for *The Computer Journal*

Edited by Professor Erol Gelenbe

Published on behalf of the British Computer Society

2009 marks the start of a new focus and format for *The Computer Journal*. Computer science has matured and evolved into many discrete areas of research. *The Computer Journal* is evolving too.

### Launching new sections!

*The Computer Journal* is now publishing papers in two sections.

**Section A: Computer Science Methods and Tools** continues to publish the more general computer science papers, as *The Computer Journal* has always done.

**Section B: Networks and Computer Systems** covers all aspects of networks, including architectures, protocols, security, operation and performance.

#### FROM 2010:

**Section C: Computational Intelligence** will address topics including artificial intelligence, machine learning, robotics, fuzzy logic, neural networks and swarm intelligence.

### Free online trial

As a special offer for delegates of IJCAI 2009, we are offering you free online access to *The Computer Journal* until 31st August 2009.

To claim your free access simply:

1. Visit [www.oxfordjournals.org](http://www.oxfordjournals.org) and go to My Account
2. Log-in or register
3. Click 'manage your subscriptions'
4. Enter A382003Q into the subscriber number box and click add subscription
5. Go to [www.comjnl.oxfordjournals.org](http://www.comjnl.oxfordjournals.org) to download full-text articles

For more information about the journal, visit
